Facsimile Transmittal Sheet

To:

Ravalli County Planning Board

Fax Number:

406-375-6507

Date:

2/6/09

Number of Pages Including This Cover:

4

Comments:

TO WHOM IT MAY CONCERN:

Many of NorthWestern Energy's city gate stations and regulator stations around the state do not have physical addresses assigned to them. They only have descriptions and driving instructions to the locations. Since this could potentially become a public safety issue if emergency crews were called to respond to an uncontrolled gas leak at these facilities, we are requesting that addresses be assigned to these locations.

Attached to this email are the city gate stations/regulator stations that are in your county. Descriptions and driving instructions to the locations are listed on each sheet. Would you please direct these sheets to the appropriate personnel in your Planning Department who will assign physical addresses to these gas facilities? Please have them call me @ 406-497-2359 if they have questions or need additional information.

Once the addresses have been assigned, they may either email or fax them back to me at the numbers listed below, or send them to me at the address listed above. When we receive the addresses, we will then have signs installed on each gate station fence that shows the address.

Thank you.
